Little Red Organics 2018 Workshare Program

Workshare is a program through which individuals agree to barter their time and labor on the farm for a share of the harvest. Compensation will be in the form of a CSA share subscription, and workshare members will have all the rights and privileges of cash CSA customers. (Workshare is for vegetable CSA shares only. Additional options (add-ons) may be purchased separately.)

Workshare participants work a set number of hours, based on the share size they choose. The price of the share is divided by **$9/hour**, which equals the total number of hours the share "costs." (For example if my chosen share costs $360 / $9 per hour = 40 hours of work during the season.)

Hours must be worked over the course of the CSA season - mid-June to mid-October. Workshare participants will agree to a schedule of hours based on their availability and the needs of the farm. Workshare folks generally work 3-4 days each month (usually Wednesdays), for 3-4 hour shifts.

Note: Workshare labor is critical to the smooth functioning of the farm. It is very important that workshare members take this commitment seriously and stick to their schedule as much as possible. Question? kate@littleredorganics.com

Please submit the following to kate@littleredorganics.com in a format of your choice:
Name
Address
Email
Phone
Okay to text?

Tell us why you're interested in workshare.

Are you most interested in:
___ Wash, weigh & pack (Requires standing [usually in the shade], bending, light lifting, ability to work quickly with hands, food safety awareness, may involve getting wet some days). Your availability on Wednesdays is necessary.

___ Field & harvest (More physically demanding. Requires standing or kneeling in the elements, ability to work quickly with hands, willingness to get down in the dirt). Your availability can be more flexible.

Tell us about your experience with/ability to work outdoors in variable conditions (it's fun, we promise!).

Are you able to commit to a work schedule? Are you willing to search for a replacement if you need to miss a shift?

Anything else you want us to know?
